Technical Speciication

Acrylic are bonded in extremely humid conditions

Use of water base synthetic resin adhesive any other the PEVA (Polyethylene Vinyl Acetate Co-polymer)

When substrate loses moisture after installation

Debonding in certain areas because of uneven substrate surface

Insufficient or lack of pressing during the bonding period of laminate

Use of extremely large acrylic/PVC laminate sheets (more than 8 ft x 2 ft long)

To avoid de lamination / air bubbles in between ply and laminate the above steps should be taken care of. Bonding of acrylic sheets shouldn't be completed under high humidity

Reasons for air bubble formations on Acrylic Sheets

Limited Warranty

Ozone Products are tested to be reasonably free of defects, and when used and fabricated properly they will comply with the applicable manufacturing specifications within realistic deviations. We recommend customers to inspect properly before installing. OZONE warranty in one way covers defects and non-compliance from or otherwise attributable to any other causes, including without limitation the following:

- Improper handling/transportation / storage of OZONE
- Improper installation of OZONE
- Improper or unintended usage of OZONE
- Improper maintenance of OZONE
- Exposure to high temperatures
- Unauthorized alteration to the products
- Outdoor applications
- There will be no guarantee or exchange under any circumstances
- Color variations in products from different batches are possible
- We recommend using products from same batch to avoid color variations
- This brochure is for presentation purpose only. Actual colors may differ.

- Exposure to direct sunlight can gravely affect the laminate's appearance
- Use of inferior or sub-standard dipped plywood or dipped lipping patti, which may chemically react the adhesive.
- Prolonged exposure to high temperature (above 30°C-35°C)
- If hot cookware or utensils are directly placed on the laminate
- To avoid the inside cracks & stretch line Do not store acrylic sheet in roll form.

Disclaimer

- Do not use plywood with high moisture content
- Do not use ply with uneven surface
- Avoid using inferior quality adhesive
- Apply sufficient pressure
- We do not recommend pasting of sheets on the printed/branding area of the plywood
- Don't use synthetic rubber adhesives such as SR / Jat Pat, Bostic, Heatex, Etc.
